

October 16, 2006
Ohyama Memorial Hall, NIES

Objectives, goals & output of Training WS

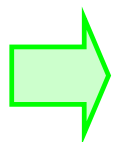

Objectives

The objective of this workshop is to learn;

- 1) ideas of **describing future vision/scenario** of achieving **a Low Carbon Society & Sustainable Development.**
- 2) modeling tools to assess **scenarios of LCS and SD toward 2050** in each participant's country.
- 3) steps **how to handle data** and **how to operate a model** as a tool for analyzing scenarios quantitatively.

There are two ways of examining future scenarios;

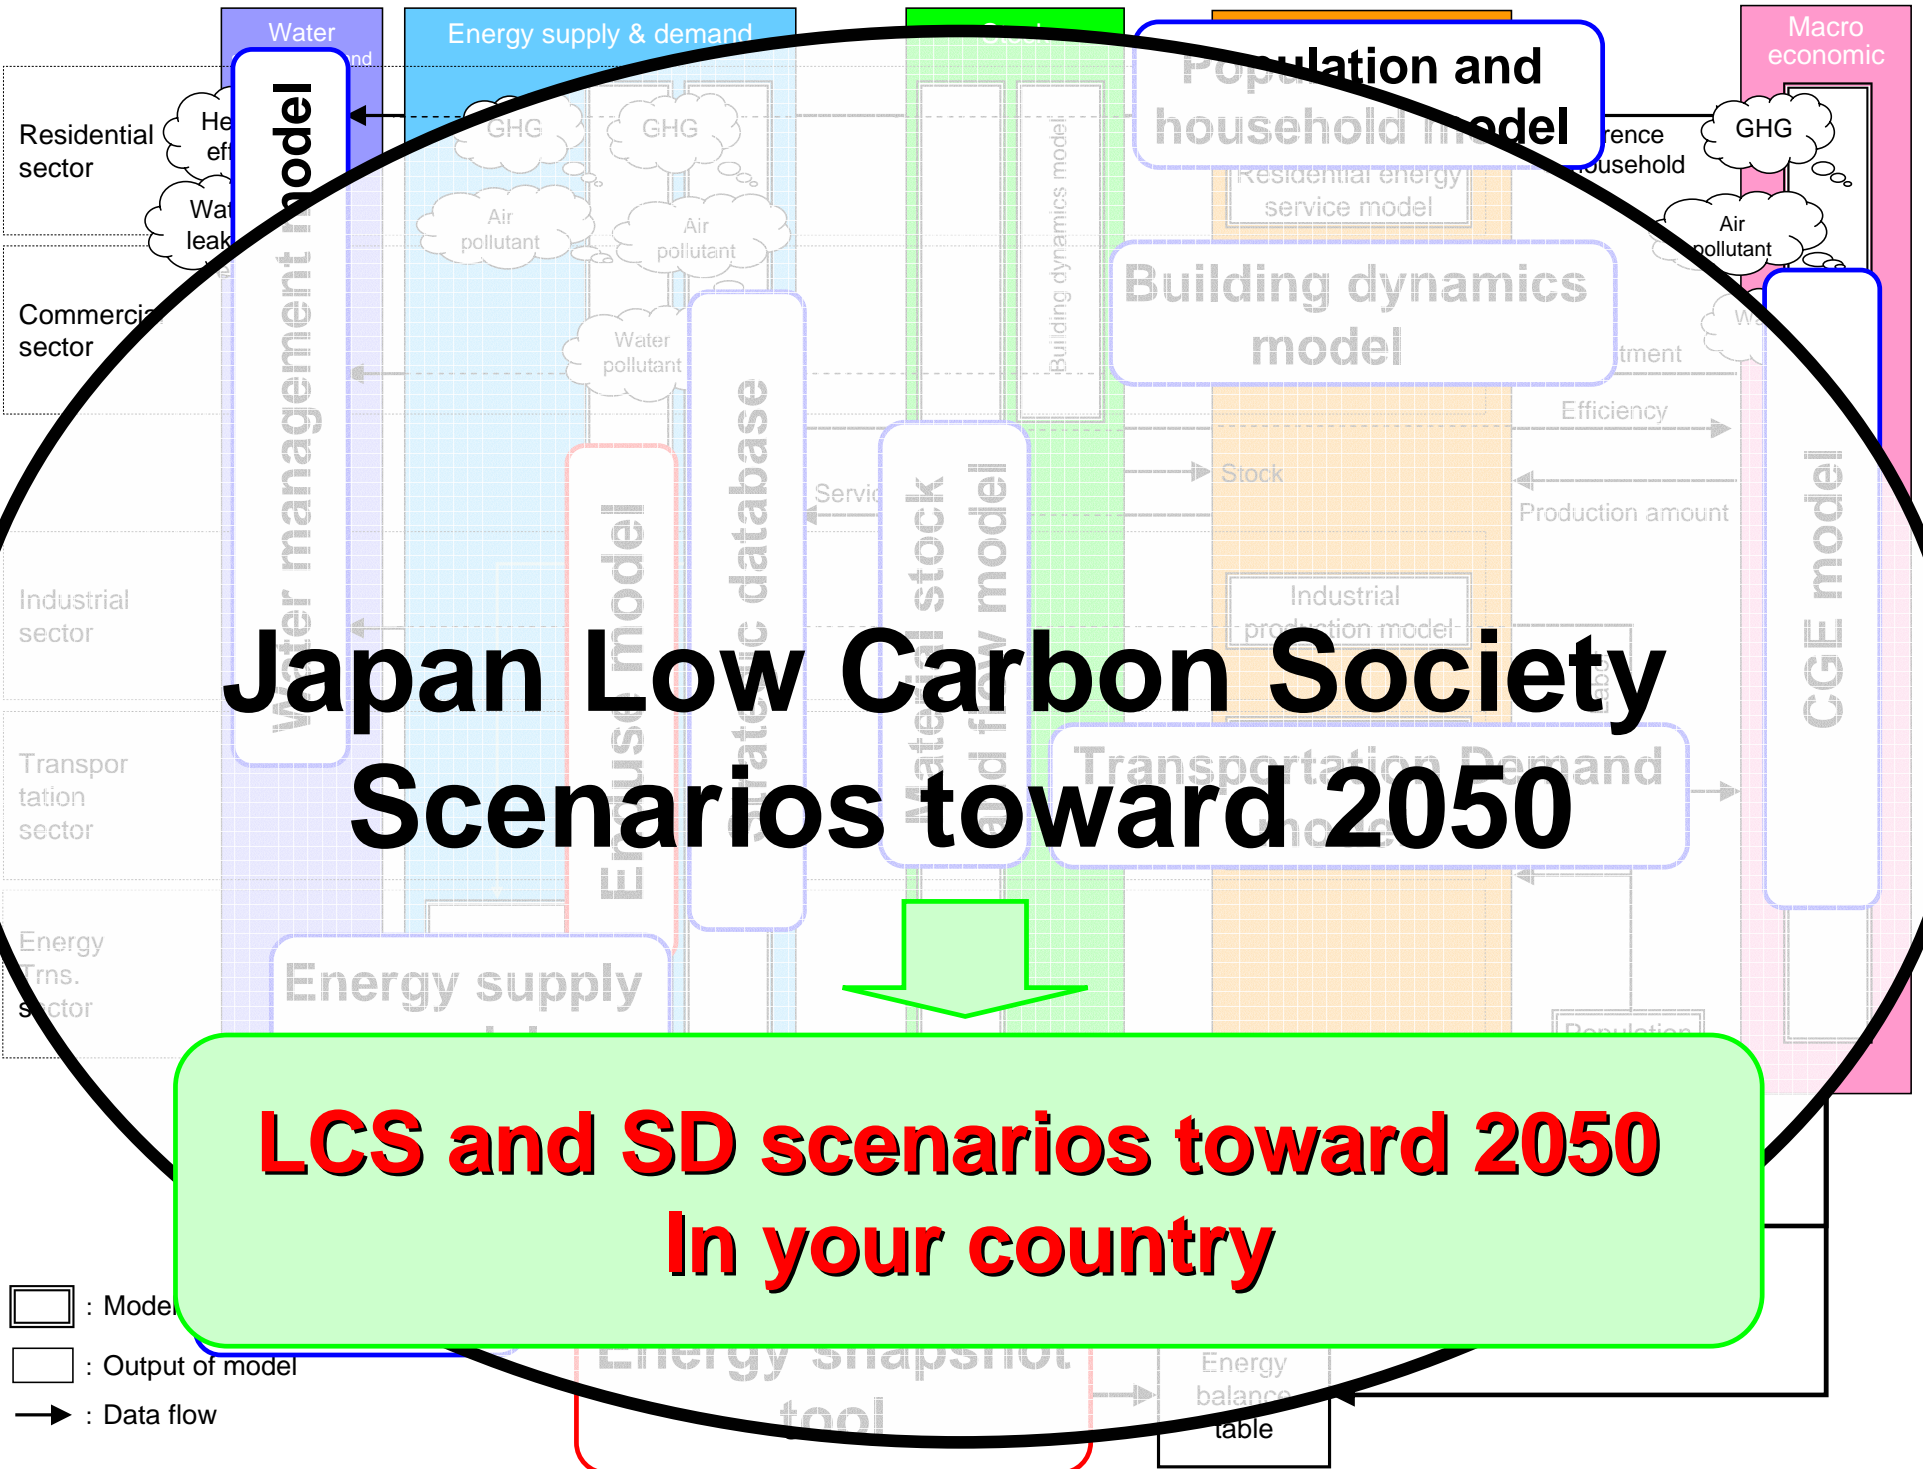

- **qualitative (narrative) scenario**
- **quantitative scenario**

quantitative scenarios analyzed by modeling tools are examined based on features of qualitative scenarios.

Japan Low Carbon Society Scenarios toward 2050

**LCS and SD scenarios toward 2050
In your country**

Expected outputs

Final day: presentation & discussion by participants.

- country results about **2050 scenarios in each country** by using model(s) which you learn during the workshop
- **10 min presentation & 5 min discussion** per country

1. India	7. Brazil
2. China	8. Russia
3. Thailand	9. South Africa
4. Korea	10. Taiwan
5. Malaysia	11. Japan
6. Indonesia	(12. USA)
