

China's Low Carbon Scenario under global 2 degree target

Toward Policy Making Process

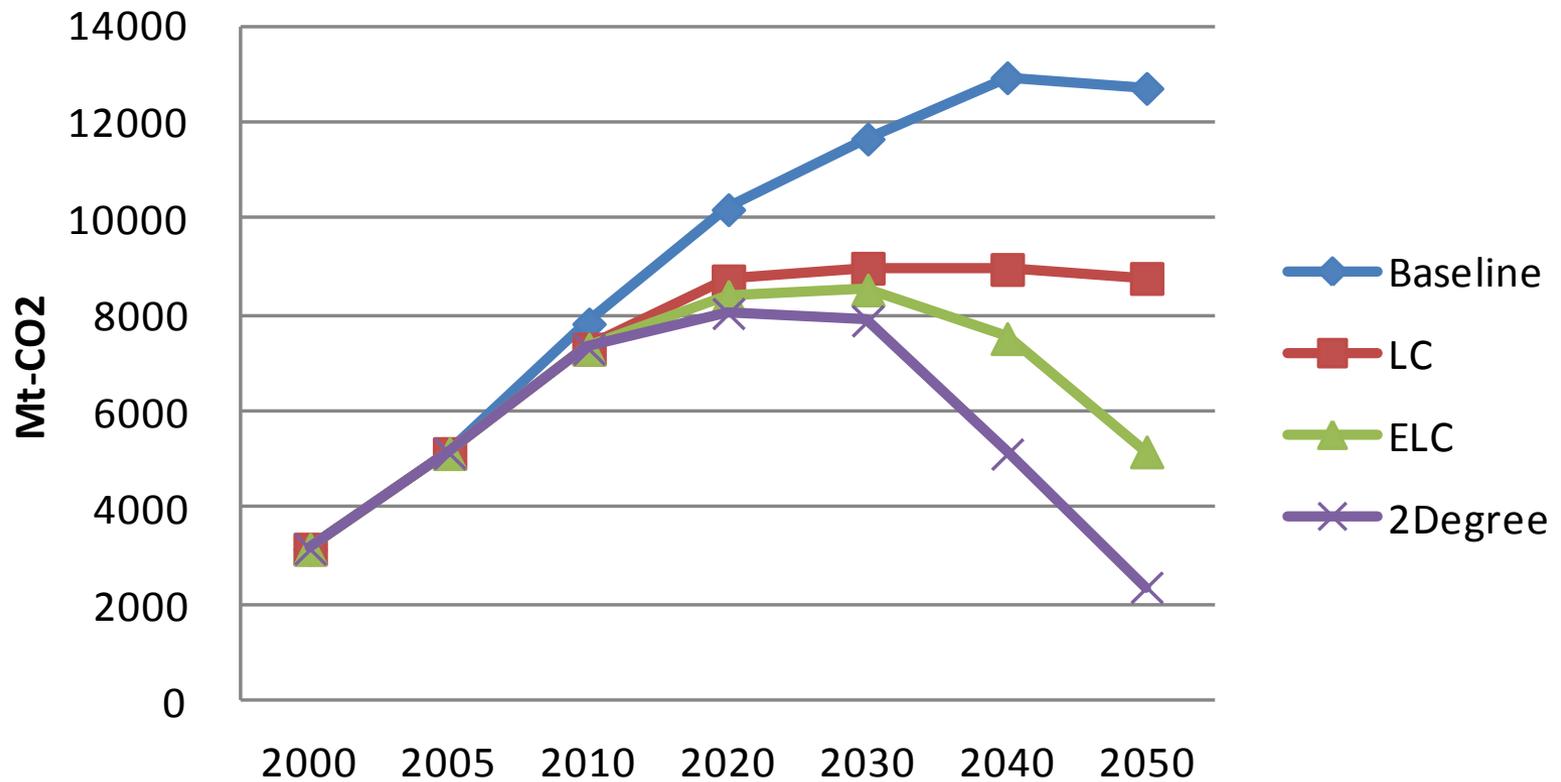

Kejun JIANG, Hu Xiulian
Kjiang@eri.org.cn

Energy Research Institute, China

19th AIM International Workshop, Tsukuba, 13-15 Dec. 2012

Transformation: CO2 emission, a rapid change

CO2 Emission in China

What we did in 2013

- Modeling analysis for key factors toward 2 degree target
- National 13th Five Year Plan: key indicators on energy and CO2
- Energy and CO2 policy roadmap in Building: MOHURD study
- Energy and CO2 policy roadmap for Transport: Ministry of Transport
- Carbon Tax regulation design
- Roadmap for CCS in China
- Up-Grading of Chinese Economy: Case study for Yangtze River
- Cap on coal modeling study
- EST cap setting for Tianjin
- EST design for 7 pilot cities
- Energy Plan for Gui Yang city
- IPCC things
- Scenario for China, US, Japan, EU

What's the future of China's low carbon policy: key factors

- Economic structure optimization policies
- Energy efficiency policies
- Renewable energy/nuclear power generation oriented policies
- CCS
- Low carbon consumption/ lifestyle
- Land use emission reduction policies: so far relatively poor
- Climate change target: China is key part of that
- Can we pay for it? Cost and benefit

Products output in major sectors, Low Carbon and ELC

	Unit	2005	2020	2030	2040	2050
Steel	Million ton	355	610	570	440	360
Cement	Million ton	1060	1600	1600	1200	900
Glass	Million cases	399	650	690	670	580
Copper	Million ton	2.6	7	7	6.5	4.6
Ammonia	Million ton	8.51	16	16	15	12

2050年的低碳住宅 舒适和节能

太阳能利用

光伏电池

(25-47% 的家庭拥有屋顶光伏电池，
转换效率接近30%)

生态生活教育

减少10-20% 能源需求

屋顶植被

太阳热利用

普及率: 20-60%
(目前 6%)

能源检测系统
(家用电器)

超高效空调

COP = 8,
普及率 100%

待机电源耗电

降低1/3,
普及率100%

高效照明
【如 LED照明】

减少50%照明需求,
普及率 100%

高效绝热

减少 60% 采暖需求,
普及率70%

燃料电池

普及率 0-20%

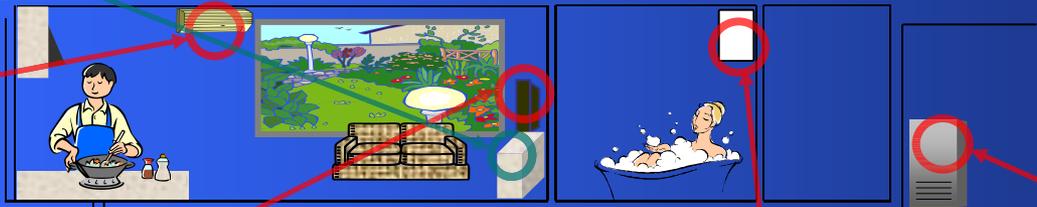

热泵采暖

COP=5
普及率 30-70%

向公众提供经济和环境
信息促使大家成为
低碳消费

高效家用电器

减少能源需求，支持舒适和安全生活方式

Industry CO2 emission will reach peak before 2020

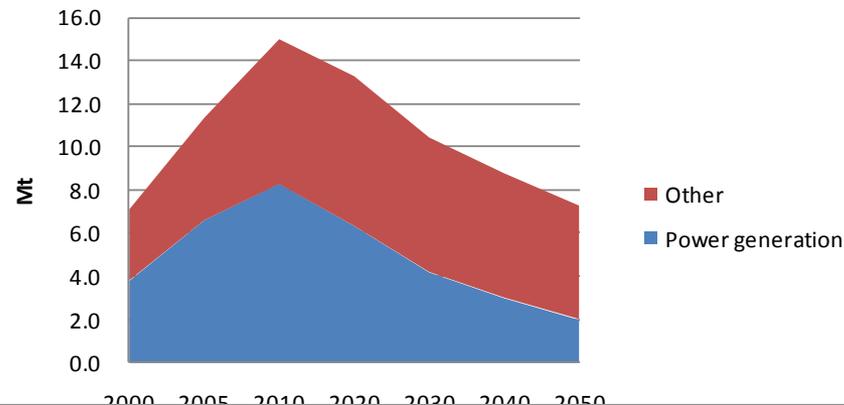

工业CO2排放量

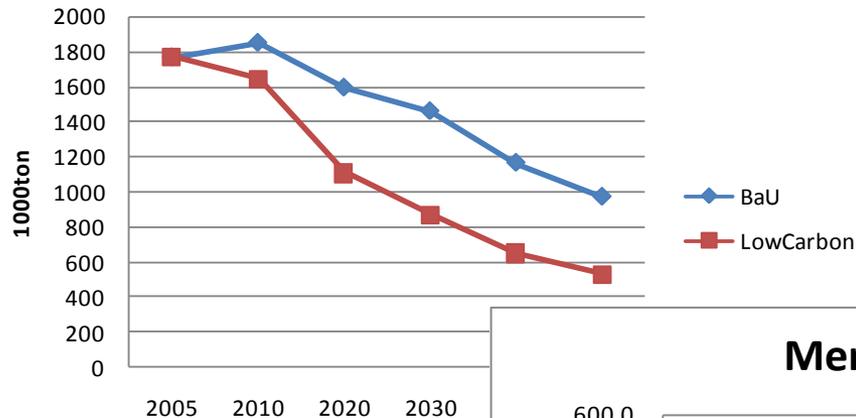

SO2 Emission

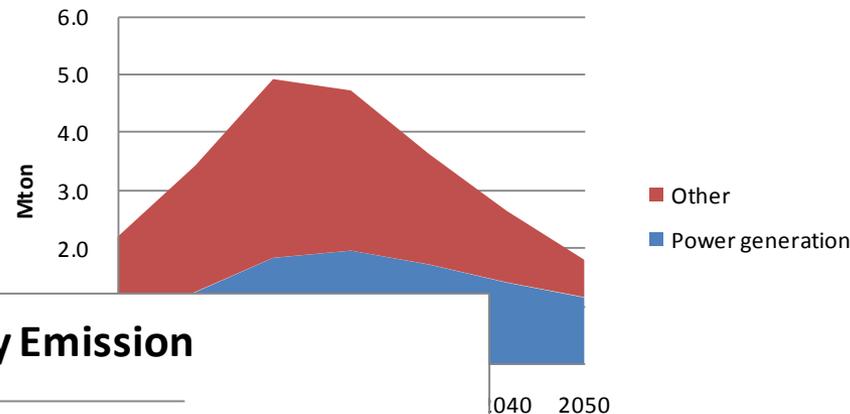

NOx Emission in China, ELC scenario

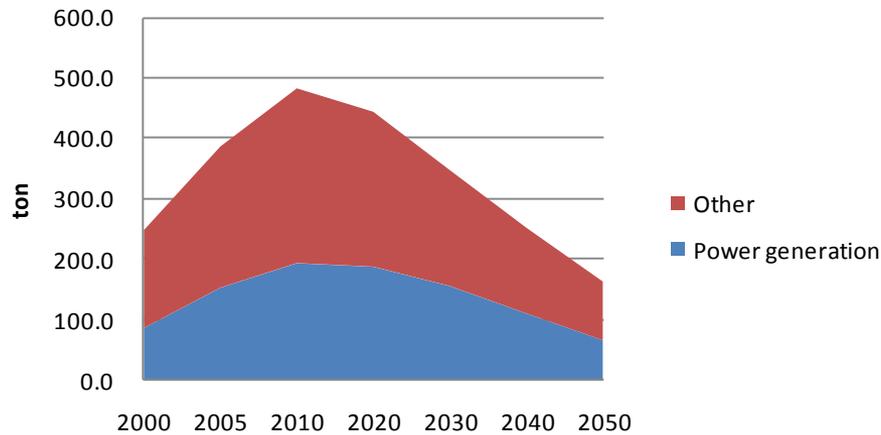

Black Carbon Emission in China

PM2.5 Emission

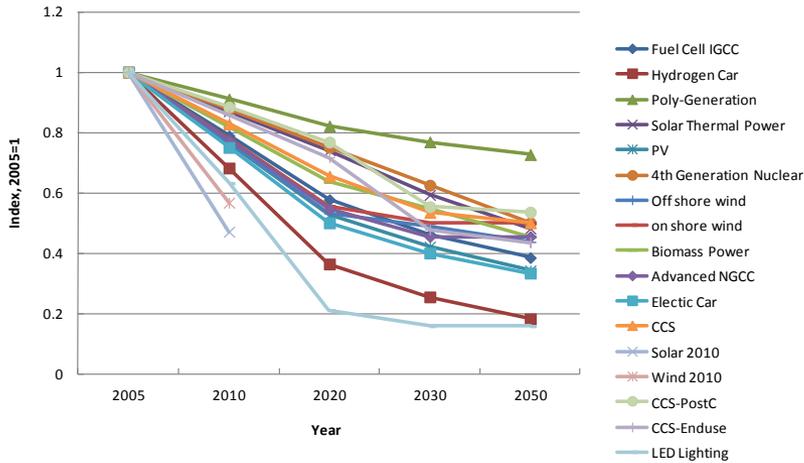

Mercury Emission

Can we do it: Peak before 2025?

- Economic structure will change soon, pushing by policy or wait until market decide(this will cause big problem for low capacity utilization)
- Technology is ready
- Economic ability is getting much stronger to pay for low carbon development
- Global target need us move faster
- Low carbon development is getting to be a main stream in China

Technology learning curve

荣威E50的长/宽/高分别为3569/1551/1540mm, 其定位为A00级紧凑型车。

Price: US\$38000

Subsidy: US\$15000(Shanghai), no need to apply number plate(cost US\$10000)

US\$18000(Beijing), no need to apply number plate(By Oct. 2012, 1.1 million people apply for 20000number plates per month),

By 2020, Wind 200GW to 250GW, Solar 50WG

Renewable Energy

- Renewable Energy Planning 2006: wind 30GW, Solar 2GW by 2020
- 2009 Energy Bureau: Wind 80WG
- 2010 Energy Planning: Wind 150 GW, Solar 20GW by 2020
- Now: Wind 200GW to 250GW, Solar 50WG
- Based on the conclusion from Chinese Academy for Engineering, grid in China could adopt these renewable energy power generation in short term.

Renewable Energy

- Renewable Energy Planning 2006: wind 30GW, Solar 2GW by 2020
- 2009 Energy Bureau: Wind 80WG
- 2010 Energy Planning: Wind 150 GW, Solar 20GW by 2020
- 2013, the 12th Five Year Plan: 20GW of solar PV by 2015, 150GW wind
- February 2013, 35GW PV by 2015

- Now: Wind 200GW to 300GW, Solar 50WG to 120 GW
- Based on the conclusion from Chinese Academy for Engineering, grid in China could adopt these renewable energy power generation in short term.
- By Nov.2013, the plan on renewable energy development could be revised again, 43GW for solar.

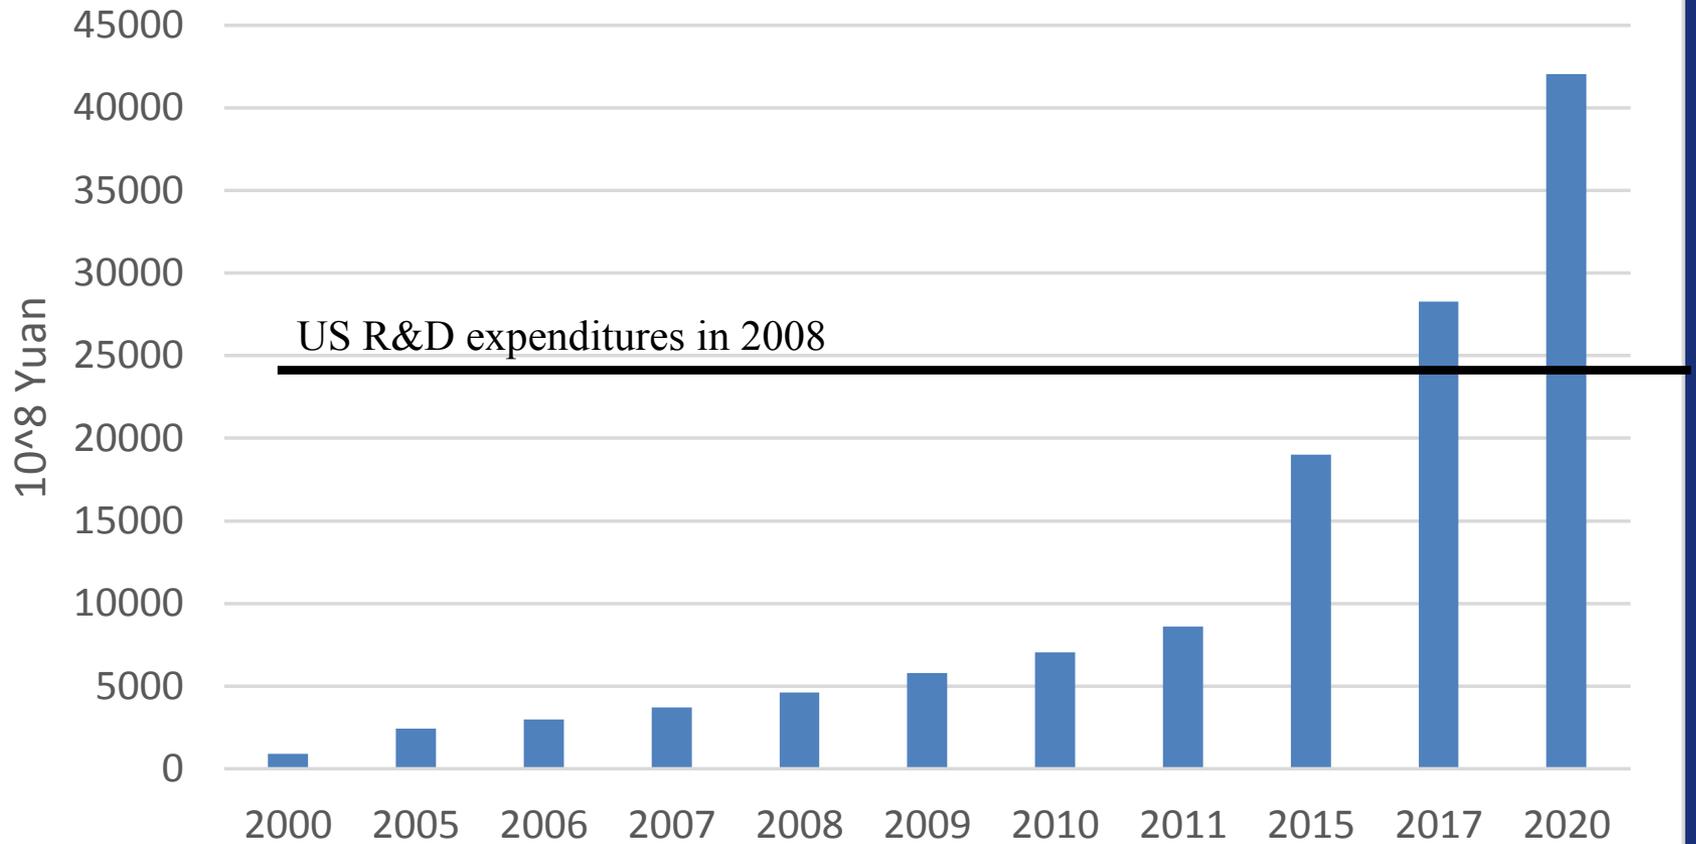

Natural Gas Scenarios

- In 2010, Natural Gas use 107.2BCM, while 12.2BCM imported.
- In our low carbon scenario: by 2030, 370BCM
- NEA's planning: 260BCM by 2015/230BCM

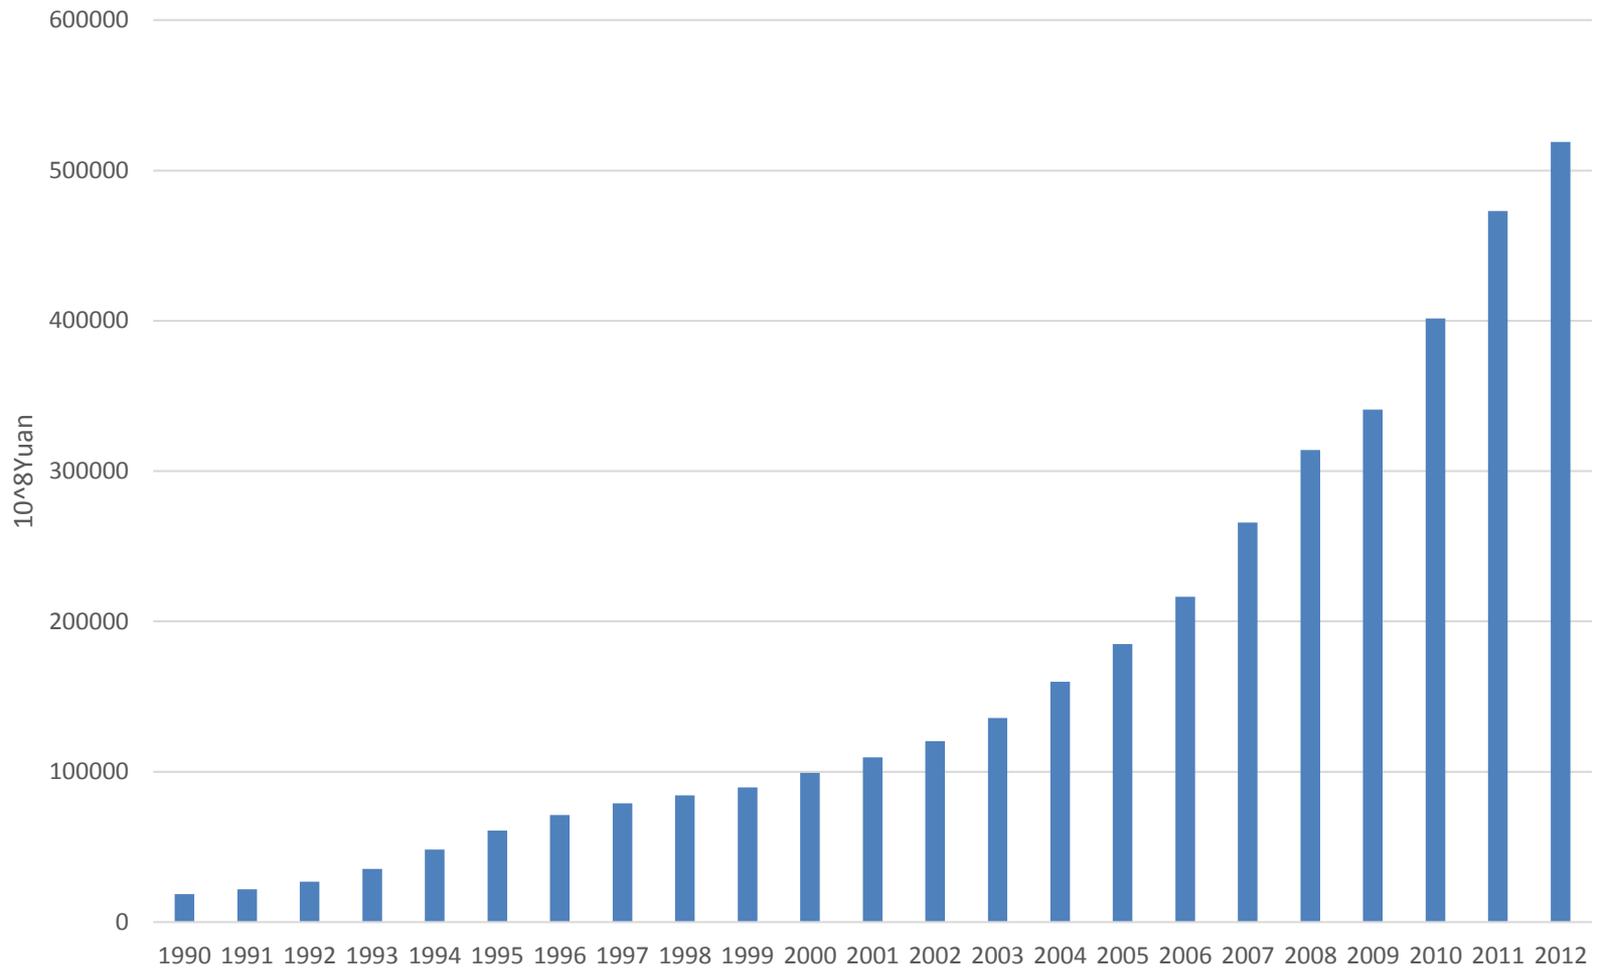

The New Five Year Plan on Air Pollution Control

- From 2013 to 2017
- Target: 30% improvement of air pollution
- A package of policies
- In which: reducing coal use in key areas including Beijing-Tianjin-Hebei region, Yangtze Delta Regions, Pearl River Delta Region
- Clean oil supply for vehicle, upgrade emission standard and oil quality
- Regulation on diffusion on high efficiency cars
