

Cambodia's Position for COP-21

The 20th AIM International Workshop

23-24 January 2015
Tsukuba, Japan

Mr. Hak Mao
Ministry of Environment
Cambodia

I. GHG EMISSIONS IN CAMBODIA

■ GHG emissions (SNC):

- 1994, a net sink and offset approximately 5,142 Gg. of CO₂ eq.
- 2000, a net emitter, total national net emissions of 220 Gg. of CO₂ eq.
- Main emissions sector: AFOLU
- Per capita emissions 0.31tCO₂ in 2000

■ Based on the SNC, no emissions reduction target was set

■ CDM is prioritized for GHG emissions reduction

II. GOVERNMENT'S POSITION

- **Annex 1 parties should determine their political commitments and leadership to increase the level of GHG mitigation;**
- **Support the Doha Amendment of the Kyoto Protocol in filling the pre-2020 emission reduction commitment gaps;**
- **Set a proper carbon pricing so that REDD Plus can be economically competitive;**
- **Support the provision of new, additional and predictable finance from public sources by Annex I Parties;**

- **Need more commitment from Annex I Parties to increase their financial contributions to the Green Climate Fund**
- **Annex I Parties should provide further financial supports to meet the target of US\$100 billion annually by 2020; and**
- **The 2015 agreement should compose of Measurement, Reporting and Verification (MRV) of financing, meeting costs of adaptation, development and transfer of technology, and capacity building provided by Annex I Parties.**
