31st AIM International Workshop  
2025.07.23/NIES

# AIM Global Research discussions

Exchange ideas about how to achieve consistency in global research at AIM

① Where are we → review ongoing relevant projects  
(domestic and international)

④ Global research on climate impacts: set-up and overall discussion.

③ How to get there → long-term operation/strategy  
Handling of MIPs considering young generation, strategy for fund rising, other.

② Where do we want to go → team's goal, impact on international arena, contribution to AR7 and policy processes, paper production (quantity/quality).

Goal at AIM Global (tentative proposal) (5~10 years)

Deliver knowledge about climate change mitigation jointly with developing countries and the Global South in general with special focus on Asia, aiming to be a world leader with vision different from other developed countries.

「アジアを中心に途上国などのグローバルサウスと連帯しながら、先進国の中で他国(EU)とは異なる見通しをもって気候緩和策に関する知見を提供し、その中で世界トップを目指す」
